G1

1- Not recommended to use tables for HTML layout, why?

- because they are striving for a web in which content and structure are completely separate from presentation.

2- Rewrite the above code in the “2. Procedure section” using semantic elements and attributes but without using the tables and CSS.

```
<header>
<h1>Front-End Development Course</h1>
</header>
<main>
  <nav>
    <h2>Main Menu</h2>
    <ul>
      <li>HTML</li>
      <li>CSS</li>
      <li>JavaScript</li>
    </ul>
  </nav>
  <section>
    <p>In this lab, students will study Front-End Development
    course.</p>
  </section>
```

```
        </main>
        <figure>

        </figure>
        <footer>
<p>&copy; 2023 Web Programming LAB</p>
        </footer>
    </body>
</htm>
```
